

# Up your mobile security game.

For today's rapidly growing mobile data communications, SnippetSentry™ empowers companies to tackle security challenges before they become problems.

## How it works

### Capture

Capture data from mobile apps and channels with no change to user behavior.

### Observe

Observe in-flight mobile data to catch small problems before they become big.

### Engage

Analyze anomalies, trigger enterprise actions, (Eg. MDM triggers).

### Dispatch

Archive data for analysis and audit for a complete enterprise record.

A proactive, highly automated, globally scalable solution, SnippetSentry™ strengthens your existing security posture; providing visibility into all mobile communications data across messaging apps, enabling effective, efficient and secure mobile data transmission -- **by anyone, everywhere, without missing a beat.**

## Built for the enterprise

### Strengthen

your security posture allowing more effective and secure business dealings.

### Expand

your customer reach and sales velocity by meeting your customers where they do business.

### Empower

your teams by protecting your people and the data they access.

"We're thrilled to be using SnippetSentry because it will give us more comprehensive control over the ever-expanding range of digital communication. It vastly extends the reach of our business in a way that increases our customer contact in a seamless and compliant manner."

- Bruce Roberts, CEO Carofin

✓ No data breaches

✓ No compliance failures

✓ No brand damage
